# DUMP, 30 TON, 30-YARD

2 AXLE, MAXIMUM PAYLOAD 60,000 LBS

## HYDRAULIC

The hydraulic lift cylinder allows and restricts the trailer dumping angle up to 45°, which is optimal for ejecting debris and maintaining a safe operating height.

## DROP DECK FEATURE

The drop deck allows for more volume and reduces overall height, also the trailer is safer than other trailers due to the lower center of gravity.

## TARP SYSTEM

Automatic Tarp system provided in cab controls makes operation fast and efficient in the field.

## TAIL GATE

Heavy Duty barn door type gate, hinges and lockable.

## COLOR OPTIONS

Globe Trailers can powder coat to the color of your choice.

## LIGHTING SYSTEM

All Lighting is LED and mounted in rubber grommets to DOT standards.

WHEEL OPTIONS

All Globe trailers come with standard HUB piloted disc wheels. Wheels are also available in all Aluminum or Outer Aluminum.

COLOR CODED HOSES

Color coded air hoses allow for easy trouble shooting and maintenance.

STEMCO WHEEL WARRANTY

5 year wheel end warranty. Guardian wheel seals, Pro-Torq spindle nuts and Sentinel hub caps.

LANDING GEAR

2 speed Landing Gear, allows for 160,000 lbs static load.

All Globe Trailers are 100% powder coat finished. The entire process takes place at Globe's manufacturing facility. This eliminates the possibility of contamination occurring in transit between process phases. The process starts with sandblasting the trailer to near white, preheating the trailer steel in a dedicated, gas fired oven to optimum bonding temperature and applying an electrostatically charged zinc rich primer. The trailer then goes back in the oven to allow the primer to bond. After the primer has bonded, a top coat chosen from one of Globe Trailers' 188 color options is applied before once more going back in the oven to cure. The result is a durable, easily cleaned finish that protects the trailer from corrosion and ensures a long service life.
